1 PREFACE

The Unified Waqf Management, Empowerment, Efficiency, and Development (UMEED) Portal is a key initiative launched by the Ministry of Minority Affairs, Government of India, with the objective of enhancing governance, transparency, and accountability in the administration of Waqf properties across the country.

This User Manual has been developed to assist new users in navigating the portal efficiently. It provides a comprehensive, step-by-step guide to the online registration process and the submission of Waqf-related forms, including declarations of property, encroachments, and other relevant information.

The portal empowers users by offering a centralized digital platform to manage Waqf property data while ensuring compliance with the legal framework established under Section 3(ka) of the Umeed Act, 1995. This initiative is a significant step toward the modernization and streamlining of Waqf administration in India.

The manual is intended to facilitate ease of use, promote transparency, and encourage active participation in the safeguarding and development of Waqf. It is a vital resource for individuals and institutions engaging with the portal for the first time, ensuring clarity, consistency, and completeness in data submission.
